Internship Job Description

Role: Deepfakes & Synthetic Media Research Intern
Company: Deeptrack Inc
Location: Remote / Hybrid
Duration: 3–6 months
Commitment: Part-time / Full-time (flexible)

About Deeptrack

Deeptrack builds AI-powered tools to detect, verify, and analyse synthetic media, misinformation, and digital fraud across media, finance, insurance, and government sectors. Our work supports journalists, investigators, institutions, and the public in navigating an era of AI-generated content.

About the Deeptrack Deepfakes News & Research Center

We are launching a dedicated **Deepfakes & Synthetic Media News Center** to track real-world deepfake incidents, emerging trends, policy developments, and notable cases globally—similar in spirit to initiatives like Reality Defender's deepfake news hub, but grounded in Deeptrack's verification capabilities.

Responsibilities

- Monitor global news, social platforms, and research for deepfake-related incidents
- Log and summarize cases in a structured database
- Assist with media verification using Deeptrack tools
- Draft short news briefs, weekly summaries, or reports
- Tag and classify cases (type, impact, region, verification status)
- Support publication on blog, newsletter, or LinkedIn

Ideal Candidate

- Background or interest in journalism, media, AI, communications, or tech policy
- Strong writing and research skills
- Curious, detail-oriented, and ethical
- Comfortable working independently with guidance
- Bonus: familiarity with misinformation, OSINT, or AI tools

What You'll Gain

- Hands-on experience in AI media verification
- Exposure to real-world deepfake cases
- By line opportunities (where appropriate)
- Mentorship from an applied AI & media-tech team
- A strong portfolio piece in a fast-growing field
